

USMAN MAQBOOL

Senior Software Engineer | Full-Stack | DevOps | Cloud

+92-3085758693 | usman.maqbol.dev@gmail.com | linkedin.com/in/usman-maqbool-10b1321b1 | github.com/usman-maqbool | Lahore, Pakistan

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 6+ years of experience specialising in back-end development, DevOps, and scalable full-stack web applications. Proficient in Python, Django, FastAPI, React.js, and PostgreSQL, with deep expertise in system design, REST APIs, GraphQL, Docker, and AWS. Demonstrated track record of leading cross-functional teams, architecting high-availability systems, improving deployment timelines, reducing system downtime, and driving engineering excellence across diverse technology stacks.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Bash

Frameworks & Libraries: Django, FastAPI, Flask, React.js

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, CloudWatch, Fargate), Docker, Nginx, CI/CD (GitHub Actions, GitLab CI/CD)

Databases: PostgreSQL, MySQL, MongoDB

Message Brokers: RabbitMQ

Tools & Platforms: Git, GitHub, GitLab, Electron, IoT integrations, Microservices architecture

Concepts: System Design, REST APIs, GraphQL, Machine Learning, Agile/Scrum

PROFESSIONAL EXPERIENCE

Djeneric Solutions

Lahore, Pakistan

Senior Software Engineer II

November 2023 - Present

- Lead full-stack development initiatives integrating system design principles to deliver scalable, production-grade solutions for international clients.
- Architected and built ZeroCheating, an exam integrity platform using React Native, Electron, and Django, reducing manual proctoring overhead by automating surveillance workflows via GitHub Actions CI/CD pipelines.
- Developed Easy Patent Search, an AI-powered patent discovery tool, improving search accuracy and significantly reducing research time for IP professionals.
- Built Delineate, a Co-Pilot application for Quantitative Systems Pharmacology (QSP) researchers, designing high-availability backend architecture with robust data processing pipelines.
- Enforced code quality standards through peer code reviews, automated testing, and CI/CD best practices across the engineering team.

StudioX

Lahore, Pakistan

Senior Software Engineer I

August 2021 - October 2023

- Developed and maintained enterprise-grade web applications using Django and React.js, delivering efficient, well-tested Python services.
- Engineered and maintained an IoT-based Qualcomm AFC (Automated Frequency Coordination) portal and DMVI system, improving system reliability and reducing unplanned downtime across the platform.
- Streamlined deployment pipelines using GitLab CI/CD, Docker, and AWS, cutting deployment time significantly and eliminating environment inconsistencies across services.
- Collaborated with product and QA teams to define technical requirements, ensuring delivery of features aligned with business objectives.

Crowdbotics

Full Stack Engineer

Lahore, Pakistan

December 2020 - August 2021

- Collaborated with senior engineers to design a scalable cloud infrastructure enabling homeowners to communicate with and control smart home devices across multiple OEM brands.
- Contributed to backend API development and front-end component integration, broadening device compatibility coverage across multiple OEM brands.
- Reduced feature development time by leveraging a modular component library, identifying and adapting reusable code across services to avoid duplication and accelerate delivery.

Dextersol

Django Developer

Lahore, Pakistan

November 2019 - December 2020

- Designed and delivered 30+ web applications using Django and Flask for backend services, and HTML/CSS/JS with Bootstrap for responsive front-end interfaces.
- Improved application performance and scalability by refactoring legacy backend logic and optimising database queries, achieving measurable reductions in page load times.
- Streamlined release cycles by integrating automated testing and deployment optimisation practices, resulting in fewer production incidents and more stable releases.

Optimum Tech

Python Developer

Lahore, Pakistan

January 2019 - September 2019

- Contributed to foundational AI/ML projects, leveraging scikit-learn, Pandas, and Matplotlib to develop predictive models and generate data-driven insights.
- Gained hands-on experience in model testing, optimisation, and deployment, using Git to streamline the development workflow and reduce integration errors.

EDUCATION

Government College University Faisalabad

Bachelor of Science in Information Technology (BS-IT)

Faisalabad, Pakistan

August 2018 - May 2022

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (SAA-C03) | Udemy | 2021

LANGUAGES

English - Professional Proficiency | Urdu - Native
